

Jan Čejka

Senior Software Architect / PHP Developer

Backend Architecture, DevOps, Docker/Linux, CI/CD

dev@jancejka.cz · +420 799 797 393 · dev.jancejka.cz · github.com/Cuchulain

Freelance / contract · Remote-first / hybrid by agreement · Czech Republic

PROFILE

Senior Software Architect and PHP Developer with strong DevOps and infrastructure background. Focused on PHP, Symfony, Nette, backend architecture, API integrations, Docker/Linux deployments, CI/CD and long-term maintainability of web systems.

EXPERIENCE

DevOps, Full-stack Developer & Cybersecurity Manager

2024 - 2026

Softopus

Server configuration, deployment automation and full-stack development across backend and frontend. Responsibility for cybersecurity, secure operations and infrastructure support.

DevOps · Cybersecurity · Symfony · PostgreSQL · JavaScript · Bash · Azure DevOps · Solr · Linux

Senior Developer & Team Leader

2020 - 2022

Stavario

Led a development team, built ERP and web application parts, designed application architecture, worked on backend development, infrastructure and migration to Microsoft Azure and Kubernetes.

PHP · Nette · JavaScript · MariaDB · Redis · Docker · GitHub · Bash · Azure · Kubernetes

Software Architect

2019

Česká televize

Designed architecture for a platform handling video processing and distribution, with focus on data flows, integration services, queues, scalability and operational reliability.

Architecture · PHP · JavaScript · Kafka · RabbitMQ · Docker · Linux

Software Architect & Senior Full-stack Developer

2017 - 2018

Czech News Center

Developed Facebook and Viber chatbots, internal CMS and integration services. Participated in AI/neural-network related implementation and backend technologies.

PHP · Nette · JavaScript · Node.js · Go · PostgreSQL · Redis · RabbitMQ · Docker

Senior Developer / Software Engineer / IT Specialist

1993 - present

Zakázkový vývoj / OSVČ

Long-term development of web, backend and database systems, integrations, server administration, automation and technical support for small and larger projects.

PHP · Delphi · ASP/ASP.NET · SQL · Linux · Windows · Docker · integrations

CORE STRENGTHS

- takeover, stabilization and further development of existing applications
- sustainable backend and integration architecture
- PHP 8.x, Symfony, Nette, Doctrine, REST API
- Docker, Linux, CI/CD, server administration and production operations
- PostgreSQL, MySQL/MariaDB, MS SQL databases
- technical leadership and communication with business and engineering teams

TECHNOLOGIES

Backend

PHP 8.x · Symfony · Nette · Doctrine · REST API · Node.js · Go · Python

DevOps & Infrastructure

Docker · Linux · Bash · CI/CD · GitHub Actions · GitLab CI/CD · Azure DevOps · Kubernetes · monitoring

Databases

PostgreSQL · MySQL/MariaDB · MS SQL · Redis · RabbitMQ · Solr

Frontend

HTML · CSS · JavaScript · jQuery · React · Tailwind CSS

Architecture

backend architecture · integrations · legacy stabilization · performance · security basics · team support
